

# Automated Door Equipment Saves You Time & Money...

## Pre-Hung Door Machine - Model 996E-TS

- Processes doors 6'8" to 8'0"
- Bi-Lingual touch screen
- Self-diagnostics
- Touch screen switching from flush to 3 degree mortising
- Programmable lock bore/deadbolt locations
- Handles raised panel/raised molding doors
- Processes strike jam
- Hinge application with QuikDump screw hoppers
- Pre-drill available

### With Bi-Lingual Touch Screen

## Trim Saw - Model 845

- Highest capacity trim saw currently available - up to 1,800 pieces per hour
- Handles material 2-1/4" to 3-1/2" wide
- Cuts headers and legs up to 8' long
- Simultaneously machines spline or biscuit for MDF products
- Positive stops at 45 or 90 degrees
- Simple operating controls

## Door Assembly Machine - Model 1296

- Completes automated door assembly line
- Head and leg clamps ensure correct and accurate placement
- Capability to hold door closed for shipment
- Capability to staple split jams for shipment
- Accommodates 4 different staple patterns

Choose the Pre-Drill Option on our Pre-Hung Door Machines

This option is now available on both of our machines. They're mounted to the router bases and simultaneously drill pilot holes for hinge screw application. The devices pivot to remain out of the way while routing, position automatically for drilling, and then retract again after the application is completed. We can also field install them on machines you already own.

# Stair Manufacturing Equipment For Superior Efficiency...

## Programmable Stair Stringer Router - Model CNCMFSR

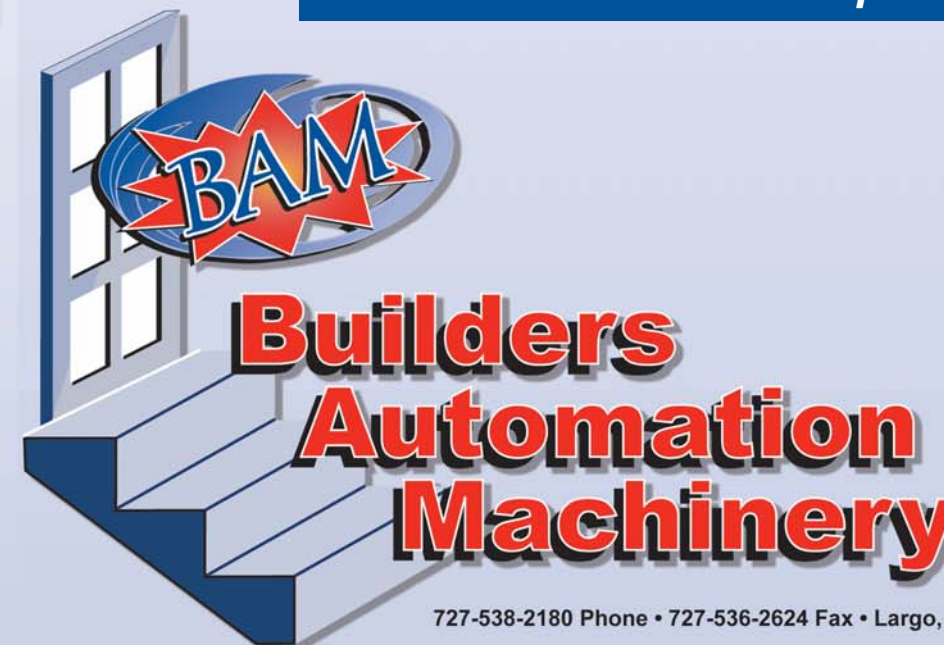

- Touch screen programmable 4-axis, servo driven machine (operator or CAD downloadable)
- Makes top and bottom landing cuts without additional handling
- Two high frequency routers that accommodate shanks of 1/2" or 5/8" diameter
- Accepts one or 2 stringers simultaneously for a total 3" maximum thickness and 7-3/4" to 15-3/4" wide
- Four cylinder clamps - 2 fixed and 2 adjustable - for up to 1,700 pounds of stringer clamping force
- Accommodates staircase angles from 20 to 40 degrees and riser kickback from 5 to 11 degrees
- Programmable to cut any combination of box, contemporary or open stairs

## Wedge Cutter - Model 2220

- Produces 15 to 20 wedges per minute
- Easily changeable to cut glue blocks
- 3" Hose removes sawdust in clean, efficient manner
- Easily adjustable for angle and wedge thickness with 2 available settings
- Guide holds approximately 40 pieces of wood

**Top Quality Equipment  
Priced 30% Lower  
Than Most Of Our Competition**
